

AETOS Range ProLyft Aetos launch

Prolyft Aetos Hoist Launch in Kuala Lumpur

Friday 25th October, PAP organized the launch for her customers in Malaysia of the new Prolyft AETOS Chainhoist and controller line. Following the international launch for Prolyft Service Points earlier this year and for the end users through most of the exhibitions on a global scale, this time it was purely for the Malaysian users varying from theatre till production companies and dealers. The complete Aetos line was on display featuring the 500 and 1000Kg version, the Aetos 4 channel controller and the range of manual chain hoist were shown and demonstrated to the audience.

The attendees did also get a brief introduction on the Auxo range of products which are planned to be launched next year. AETOS is not the last level, AUXO will be "The Next Level". AUXO, standard solutions for simple and complex situation and answering the daily needs of safe entertainment rigging, will be introduced in 2014.

Also a life demonstration of the mobile tester was conducted. The mobile tester is a small device which can be used on site to execute a life load test on hoist and saving the results online in the Prolyft database. And creating substantial saving in respect of time and transportation.
