

DIMET "ROCKS" MALAYSIA WITH MPT ROOF!

Dimet Lighting & Musical Supplies, based in Penang, being the first rental company in Malaysia, who purchased Prolyte truss, toured throughout the Peninsular Malaysia during the second half of last year with their recently completed MPT roof system.

The "DIGI GE GE RIUH 2007" road tour, for one of Malaysian leading mobile phone provider ~ DIGI, traveled to major cities in five different states. The spectacular show had its climax in capital city Kuala Lumpur.

The MPT roof system, with measurements of 12x10m including sound wings, proved to be perfect for the job. As Mark Wong, managing director of Dimet commented; "The MPT roof was exactly what the promoter required for this extensive and hectic road show. We can reduce production time immensely since we are able to build up the complete system in less than five hours with a crew of only 8 people!" Like all Prolyte roof systems, this roof is provided with a full set of loading calculations and a static report that gives the promoter all certainties he requires.

Dimet started their business relation with Prolyte in 1999, when they ordered a ground support system based on MPT tower and H40V truss. Dimet was amazed by the fact that even after 8 year's, they only had to buy some simple add on parts to be able to convert this system into a complete roof system. In addition, the same set of truss can be used to build rigging towers for Dimets speaker system or can be converted to yet another roof system, the Prolyte flat roof.

When asked, Mark Wong continues: "Prolyte products are very well engineered, the outstanding design of the Prolyte products guarantees safety and durable and reliable constructions. The fact that Prolyte complies fully with all international standards just gives them the extra step ahead. As a rental company we have to be able to fully rely on the products we use, Prolyte gives us the confidence. We simply love the Prolyte products, from the easy of assembly to the full support we got from the Prolyte sales team. Our choice back in 1999 proved to be an excellent one even after 8 years! Thanks Prolyte."
