Dear Valued Partners

Jasper Van Der Sluis Joining PAP/PDJ team

Being employed by the Prolyte Group for nearly 13 years, and known by the majority of the Asian customer base, we are happy to announce that Jasper is moving onwards in the group for a new challenge. From the 1st July, he will join the Asian sales offices PAP (Prolyte Asia Pacific) and PDJ (Prolyte Doughty Japan) as Technical and Projects Manager.

Due to the strong increase in sales and in particular projects in the Asian region, Jasper has obtained knowledge of the products and expertise in hoist and rigging in general, combined with his experience, he will be adding on another layer of success to both sales offices.

As the demand for Prolyte and Doughty in Asia is strongly increasing, and projects getting more complex, it became paramount to offer further service and know-how for the region.

He will oversee and further develop the operations of the technical department, support for installation projects, enlarging the service department for re certification and will be responsible for the Asian Prolyte campuses.

We are convinced that with Jasper on board, we would be able to ensure a shorter turnaround time on technical matters and provide better support to all valued partners.

Regards

Prolyte & Doughty Asia Team
