PROLYFT HOIST CONTROLS

TOP CLASS CONTROLS, COMPETITIVELY PRICED

Polyte introduces a new range of affordable but top class hoists controls. Updated, revamped and including more options, the new range of controls offer safe and reliable performance in even the roughest circumstances. LED indication guarantees visual control when needed, reduced size makes it easy to handle. There is no need to shop elsewhere for affordable controls; the new Prolyft controls are available at very sharp rates!

MULTI CHANNEL CONTROLLERS

The Prolyft controllers are developed for the control of the PLE-series chain hoists. The controllers are available in standard 4 or 8 channel units in 19" rack housing.

The controllers allow you to control the hoists individually or simultaneously with one single button.

For larger applications the controllers can be interconnected to serve a system up to 64 channels. All pre-selected hoists will be activated by one single run button.
